

JOONHA LEE

Account Manager · Maritime Connectivity, IT & Digital Solutions

Gunpo-si, Gyeonggi-do, Republic of Korea · leejunha781@gmail.com · linkedin.com/in/joonha-lee-20b518316

PROFESSIONAL SUMMARY

Account-oriented Engineering and Business Development professional with 21+ years in maritime, naval shipbuilding, defence electronics, and satellite communications. Combines customer-facing technical engagement—system integration, verification, FAT/SAT, and commissioning—with stakeholder alignment suited to long-cycle B2B account care. Professional English communicator with KPI/quality-gate discipline and conceptual fluency in commercial PLM, SAP/ERP, and maritime digital operations (self-directed PLM study while preparing for AVEVA Consultant applications—not employed AVEVA delivery). Seeking Navarino Account Manager (Korea) to grow relationships, support pre- and post-sale experience, and build commercial pipeline ownership with integrity.

SELECTED OUTCOMES ALIGNED TO ACCOUNT MANAGEMENT

- Built durable customer trust through end-to-end maritime system delivery—from interface design and integration testing to FAT/SAT and commissioning handovers.
- Translated complex satcom and shipboard communication capabilities into clear acceptance criteria and stakeholder-aligned decisions for demanding maritime customers.
- Practised regulatory, traceability, and quality-control discipline across naval programmes—transferable to commercial fleet compliance, SLA, and performance-management conversations.
- Operated as a reliable cross-functional interface for pre-sale clarity and post-sale validation—practising retention/expansion behaviours and commercial pipeline discipline for a full Account Manager remit.

CORE COMPETENCIES

Commercial & Account Care: Consultative customer engagement · Relationship building & retention mindset · Pre-sales / post-sales technical support · Stakeholder alignment · Brand representation · Pipeline & activity discipline (CRM-ready) · Commercial proposal support · Professional English

Maritime Domain: Naval / maritime programmes · Shipboard communication & entertainment systems · Satellite connectivity (LEO / satcom) · Hybrid network & bandwidth operational awareness · FAT / SAT / commissioning · Integration & verification · Regulatory documentation & traceability

Digital / SaaS-Adjacent Fluency: Maritime digital transformation narrative · Commercial PLM concepts (self-directed learning initiated while preparing for AVEVA Consultant applications) · SAP/ERP familiarity · KPI / SLA / performance frameworks · QC & acceptance culture · Conversation fluency for onboard IT, RMM/asset inventory, cybersecurity/OT, and IT-as-a-Service solution themes

Tools & Working Methods: Jira · Confluence · ERP/PLM concepts · Interface control & wiring documentation · Project scheduling & QA gates · Evidence-based commissioning records

PROFESSIONAL EXPERIENCE

General Manager | Intellian Technologies

Mar 2023 – Jul 2025 · Seongnam, Gyeonggi, South Korea

- Oversaw design, integration, and verification of LEO satellite terminal systems, aligning technical performance with customer acceptance expectations in a regulated maritime connectivity context.
- Managed embedded-system integration for LEO parabolic and AESA-related architectures, improving operational readiness and reducing ambiguity at customer validation milestones.
- Led project scheduling and quality-assurance gates for cross-functional delivery and customer-facing technical reviews; supported FAT/SAT and commissioning with clear stakeholder communication.
- Acted as a professional company interface to customers and partners, reinforcing brand trust through disciplined delivery, documentation, and issue ownership.

- Applied KPI-minded progress tracking and Jira/Confluence-style collaboration habits to keep priorities visible across engineering and customer stakeholders.

Senior System Engineer | GENOHCO Inc.

Aug 2022 – Mar 2023 · Gunpo-si, Gyeonggi, South Korea

- Contributed to the K2 Sight Maintenance Equipment System, practising defence-grade quality expectations, configuration discipline, and stakeholder communication.
- Supported Unmanned Aerial Vehicle (UAV) Maintenance Equipment programmes across hardware-oriented system-engineering workstreams.
- Developed PCB solutions for UAV maintenance equipment, reinforcing detail orientation, documentation accuracy, and schedule reliability—foundations for account hygiene and customer confidence.

Senior Manager | Daeyang Electric Co., Ltd.

May 2005 – Apr 2022 · Busan, South Korea

- Delivered multi-year naval communication and entertainment programmes (Indonesia submarine Entertainment System; PC Communication & Broadcasting Systems), managing interface clarity, integration outcomes, and customer satisfaction across long programme lifecycles.
- Spearheaded ICS development for a 300-ton class submarine and supported 3000-ton class submarine ICS; developed internal wireless/broadcasting for Korean frigates under demanding technical and regulatory constraints.
- Performed V/UHF and satcom signal specification analysis, wiring diagrams, integration testing, and interface-box design for military secure equipment—building evidence-first, cybersecurity/OT-aware discipline transferable to commercial maritime SLA conversations.
- Sustained long-horizon relationships with shipyards, technical managers, and programme stakeholders—demonstrating the retention and trust behaviours expected of a maritime Account Manager.

EDUCATION

M.S., Embedded Systems / Electrical & Electronics Engineering

Pusan National University · 2013 – 2017 · GPA 3.79 · South Korea

- Focus: embedded systems, hardware/PCB design, industrial networking, OS-level programming (Linux/Windows); research on real-time embedded control with industrial Ethernet (EtherCAT).

B.S., Control & Instrumentation Engineering

University of Ulsan · South Korea

ALIGNMENT WITH NAVARINO (COMPANY FIT NARRATIVE)

- Vision fit: represent Navarino's ambition to be the benchmark maritime technology company—Integrity, Excellence, and Innovation in every customer interaction.
- Portfolio conversation fluency (learning, not product ownership): Starlink/hybrid connectivity, Infinity bandwidth/network management, Spectrum RMM/asset inventory, Quazar IT-as-a-Service, cybersecurity/OT (Angel/Ozora/NEMO).
- Commercial motion: retention and expansion via consultative discovery with operators, technical managers, IT, and compliance-adjacent roles; growing fluency with DPA/crewing decision chains; CRM hygiene via PLM/ERP/Jira/Confluence/KPI literacy.

LANGUAGES

Korean (Native) · English (Professional — customer engagement, written proposals, cross-border coordination)
